

6 TYPE HPA & HPC

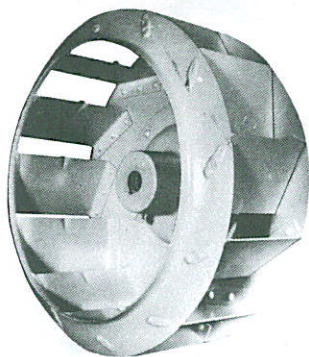

High pressure/low volume backward aerofoil or backward laminar bladed fans with conical shrouds. For high pressure/high efficiency applications.

7 B.B. TYPE BACKWARD CURVED

Bladed Fans

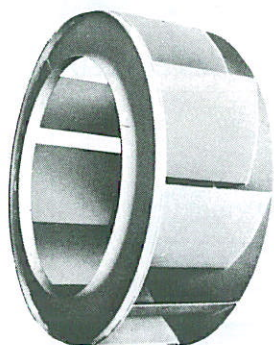

Available in 10 different widths for low volume/high pressure to high volume/low pressure clean air applications. Bag or cartridge filter exhausts, ventilation, etc.

8 F.B.B. TYPE BACKWARD INCLINED

Bladed Fans

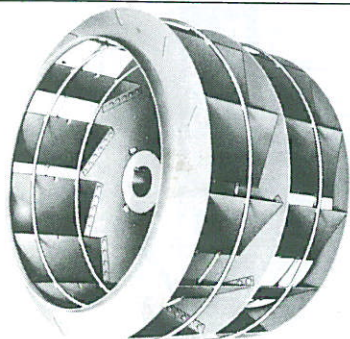

Low pressure/medium pressure. Low dust loads. Fume extraction, ventilation.

9 TYPE A.B. BACKWARD AEROFOIL

Bladed Fans

High efficiency. High volume/medium pressure applications. Clean air. Large installations where high efficiency is required.

10 TYPE F.B.B. & B.B. BACKWARD BLADED

Double inlet double width fans for high volumes and high efficiency applications.
